TECHNICAL CUSTOMER SUCCESS MANAGER | PRODUCT OPERATIONS

SUMMARY

Product Manager and Customer Success Manager in telecom SaaS, combining product ownership, key account management, and operational execution. Progressed from technical support into a senior role responsible for core accounts, service quality, customer success, and team training.

Drive product improvements by translating customer feedback and UX insights into requirements, working directly with engineering and leading feature initiatives end-to-end.

Build internal solutions using cloud workflows and Python to automate processes, close operational gaps, and improve efficiency and customer experience.

EXPERIENCE

[TelTel.io](https://www.telcel.io)

Product Manager / Senior Customer Success

Sep 2024 - Present | Riga, Latvia | On-site

- Own customer success and service delivery for key accounts, including incident management, retention, and relationship development, supporting expansion into new markets and recovery of previously lost clients
- Drive product improvements by identifying pain points, structuring requirements, and working directly with engineering to deliver features with direct impact on product positioning and customer retention
- Manage carrier relationships and routing decisions to improve service quality and commercial outcomes, reducing customer support load by approximately 30%
- Build and implement internal automation solutions (Python, AI, Cloudflare Workers), reducing manual workload and enabling consistent achievement of ~3-minute SLA targets
- Train and onboard new team members (3), establishing workflows and scaling support and customer success operations, improving consistency of customer handling

Customer Success Manager

Mar 2024 - Sep 2024 | Riga, Latvia | On-site

- Managed onboarding, account growth, and day-to-day client communication
- Acted as main liaison between clients and technical teams, improving issue resolution and product adoption

Technical Support Specialist

May 2023 - Mar 2024 | Riga, Latvia | On-site

- Resolved technical issues related to telecom services, including log analysis, bug reproduction, and escalation
- Handled incidents and client requests while maintaining SLA-driven responsiveness

[TELUS International](https://www.telusinternational.com)

Technical Support Specialist

Jul 2021 - Oct 2023 | Riga, Latvia | Hybrid

- Provided SaaS support related to marketing solutions through chat, email, and calls
- Worked with internal teams to resolve bugs, improve services, and strengthen support workflows
- Built strong communication, troubleshooting, and problem-solving skills in a structured support environment
- Consistently delivered strong performance and maintained top results against KPIs

Webhelp

Customer Support Representative

Aug 2020 - Jun 2021 | Riga, Latvia | Remote

- Delivered inbound phone and chat technical support for a wide range of devices and software solutions
- Worked with internal teams to improve products, support processes, and internal tools
- Operated effectively in a high-volume, high-pressure environment
- Reached key KPIs from the second month and maintained strong performance

SELECTED PROJECTS

Billing reconciliation and recovery

- Identified and led investigation into partner billing discrepancies, negotiating resolution and securing approximately EUR 30,000 in recovered funds
- Redesigned billing workflows, identified underlying system issues, and led cross-functional resolution with engineering and stakeholders, improving billing accuracy by an estimated 20-30% and reducing manual reconciliation effort by approximately 75%

Support and workflow automation

- Built internal automation systems using Python and AI tools for Zendesk, including webhook-based notification service, helping the team consistently meet 3-minute SLA targets
- Designed and implemented Zendesk omnichannel workflows by integrating WhatsApp and Telegram, consolidating support channels, and building automated ticket status flows using Cloudflare Workers, improving agent efficiency and reporting accuracy

Revenue and partnership initiatives

- Supported partner outreach and business development efforts, contributing to recurring revenue growth of up to EUR 7,000 per month
- Identified market opportunities, led integration of a new service offering, and coordinated product design and implementation with the technical team from concept to launch, strengthening the company's market offering
